

Focusing on the expanding role of Non-Banks in South Africa

Regulatory Risk and Compliance for NON-BANK FINANCIAL INSTITUTIONS South Africa Conference

8 & 9 May 2024, Indaba Hotel, Fourways, Johannesburg

NBFC

Media Partners

Brought to you by Trade Conferences International, organisers of the annual AML & Financial Crime Southern Africa Conference

Non-bank financial sector vulnerabilities surface as financial conditions tighten

As trends and shifts in the financial sector increases, NBFIs have emerged as key players in the financial sector. It is vitally important to understand and screen this expanding financial sector that comprises a line-up of institutions beyond banks.

Non-bank financial intermediaries including investment funds, pension funds, insurers, money market funds and credit providers, also play a key role in the global financial system by providing financial services and credit and thus supporting economic growth.

The growth of the NBF1 sector accelerated after the global financial crisis, accounting now for nearly 50 percent of global financial assets. As such, the smooth functioning of the nonbank sector is vital for financial stability.

The resilience of the non-bank financial sector and the supporting market infrastructure is crucial for the financial system to support the real economy and to absorb rather than amplify shocks.

Henceforth robust surveillance, regulation, and supervision are essential due to the tightening in policies, digital challenges and several other factors.

To assess the financial stability implications pension funds, insurance developments, academics and policy makers should improve their understanding of risks arising from the behavior of non-bank financial institutions and the evolution of the supporting market infrastructure, and how to deal with those risks.

This conference will focus on bringing the key role players from NBF1's- insurance companies, pension funds, investment intermediaries, microloan organisations together at one forum to discuss and learn how they can tackle the challenges and opportunities they face on meeting regulatory and reporting requirements.

Topics will be discussed under the following sections: regulatory risk and compliance challenges, financial inclusion, market conduct and consumer education, alternative finance market, ecosystem banking and innovation & technology.

As organisers of the annual AML & Financial Crime Southern Africa Conference and the Regulatory Risk & Compliance Conference, Trade Conferences International (TCI) is once again looking forward to welcoming delegates, speakers & sponsors to this industry event!

Who should attend?

Professionals from

Banking industry

Insurance companies

Financial services providers

Retirement funds

Fin tech

Service providers

dealing with the following

compliance * ethics * regulatory risk * insurance * AI * risk conduct risk* internal audit * risk assurance * governance * third party risk * crypto currencies * customer engagement * fair lending * KYC * technology * monitoring * regulatory supervision * SupTech * RegTech * market conduct * collective investment schemes * anti-money laundering * retirement funds * heads of sustainability * ESG professionals * risk managers * climate risk analytics managers * portfolio managers * global market sales managers * credit evaluation managers

Did you Know?

1. The NBFIs sector exhibited strong growth in 2021, driven in particular by investment funds. These benefited from the economic recovery and experienced both inflows and higher valuations of a wide range of their investments. The NBFIs sector grew by 8.9%, and its share of total financial assets remained stable at 49%.
2. The narrow measure of the NBFIs sector – comprising entities that authorities have assessed as being involved in credit intermediation activities that may pose bank-like financial stability risks – reached \$67.8 trillion in 2021, representing 28.3% of total NBFIs assets and 14.1% of total global financial assets. Collective investment vehicles with features making them susceptible to runs remained by far the largest component of the narrow measure, and their aggregate measures of credit intermediation, liquidity and maturity transformation remained at elevated levels.
3. Since 2013, NBFIs sector linkages with the banking sector through funding and exposures have continued to decrease. However, the sector continued to be a net provider of cash in the repo market and its net level of repo assets rebounded strongly in 2021.
